

# The Next Evolution

KLX SpectrA PDC downhole thru tubing motor is the Next Evolution of the industry, featuring a patented unique all-PDC bearing design that ensures market leading reliability. SpectrA PDC is a simple yet robust designed tool, comprised of only 10 parts and without using any seals or lubrication chambers; delivering increased efficiency, reliability, and reduced maintenance in today's highly demanding operations.

## FEATURES & BENEFITS

- KLX's patented lower end offering the industry's only all PDC bearing design.
- Capability of up to 7 BPM flow thru, with no need for any type of bypass sub.
- Similar design in 2-7/8" and 3-1/8".
- Designed & Developed using in-house engineering and FEA analysis
- Proven capabilities when run with large diameter coil tubing, able to withstand high bending and side loading scenarios
